### TGS Announces New Upgrades to Centerless Grinder

WARREN, MI (April 15, 2015) -- Total Grinding Solutions (TGS), a worldwide manufacturer of centerless grinders, now offers additional automation options for its new TGS-CL-6020 centerless grinder.

"Our goal is to increase our customers' production rates and efficiencies," says Chanley Chambers, TGS global sales director. "Partnering with our customers and seeking their input allowed us to determine which automation options would best boost the performance of our centerless grinder."

TGS offers gantry-style systems, vibratory bowl feeders, hopper feeders, roller conveyors, belt conveyors and a wide variety of robotic options.

The TGS-CL-6020 centerless grinder is designed for medium to large-batch production with short setup times and is able to handle a variety of grinding applications industry-wide. Able to perform dependably in the roughest production environments, the TGS-CL-6020 is built to provide many years of uninterrupted service without high maintenance costs.

#### About Total Grinding Solutions:

Total Grinding Solutions (TGS), based in southeastern Michigan, is a worldwide manufacturer of centerless grinders. TGS seeks to lead the industry by continuously engineering innovative equipment through significant investments in research and development and proactive product training. Along with the company's initial mission to manufacture quality equipment that is offered at an affordable price, TGS also focuses on machine reliability, which minimizes downtime, lengthens machine life and reduces the cost of ownership.
